Special features:

- good release effect
- low consumption
- printing, glueing of parts is possible (test to confirm)

Storage / Handling

For further information on storage, handling, hazards, etc. please refer to safety data sheet.

Packaging

spray can 400 ml (12 cans / carton)

Code No: 101020**Application**

As a release agent for processing of duroplastics (such as UP, EP, melamine resin, urea press compounds) which are also used in transfer moulding.

Apply a fine film of release agent to the clean surface of the mould. Special attention should be paid to undercuts and corners.

If the parts produced have to be lacquered or printed, we recommend that a preliminary test should be carried out. Excessive application of release agent can lead to difficulties in lacquering of printing.
