

Release Innovation™

# PRODUCT DATA

# Lusin<sup>®</sup> Alro LL 301

Silicone-free release agent for thermoplastic, duroplastic and elastomere processing

#### Benefits:

- usable with mould temperatures up to 300 °C
- can be used as lub ricant
- dry film

# **Product description**

LUSIN<sup>®</sup> ALRO LL 301 is a silicone-free release agent. Is active substance is based on a PTFE dispersion.

Temperature range: up to 300 ℃

# Further characteristics:

- colour white, dries at room temperature
- adheres well to metal, plastic and wood
- excellent release and lubricating effect
- multiple demoulding
- allows subsequent processing, e.g. laquering, printing, glueing (preliminary test required)
- cfc-free

# **Application**

For use as a multiple release agent in the processing of thermoplastics, duroplastics and elastomers where a dry release agent is required.

As a lubricant for guides and runners, e.g. packing machines, household appliances, furniture.

To reduce friction e.g. between plastic and wood or plastic and metal.

# Instructions for use:

Shake well before use. Mould should be clean and dry. Use sparingly.

Shelf life: approx. 2 years

# Storage / Handling

For further information on storage, handling, hazards, etc. please refer to safety data sheet.

# **Packaging**

spray cans 400 ml (12 cans per carton) Code No: 001030

1
