PRODUCT DATA

LUSIN® CLEAN G 300

Ready-to-use purging compound for screws, cylinders and heads of blow machines and extruders

Benefits:

- suitable for all plastics up to a processing temperature of 300 °C
- low consumption economical
- no smell during application
- rapid cleaning effect
- approved for the production of food grade products

Product description

LUSIN[®] CLEAN G 300 is a granular purging compound based on a high grade thermoplastic material with cleaning additives. It is suitable for use at processing temperatures up to 300 °C

- removes within the operational temperature deposits from screw, cylinder and head
- for cleaning of screw when colour or material is changed
- cleans gently as it contains no abrasives or solvents
- does not smell

Application

- 1. Dosage refer to table
- 2. Empty cylinder
- 3. Fill hopper with LUSIN[®] CLEAN G 300 and plasticize it through the cylinder. Cleaning temperature as for processing of previous material.
- When LUSIN[®] CLEAN G 300 comes out of the cylinder, stop the screw and let the material react for 5 - 10 minutes.
 After this period plasticize the rest of LUSIN[®] CLEAN G 300.

This operation can be repeated in case of strong contamination.

- 5. Plasticize LUSIN® CLEAN G 300 through the cylinder.
- Fill the new plastic material into the hopper.
 Set machine at processing temperature for new material. Eject the rest of the cleaner and run normal production.

Storage / Handling

For further information on storage, handling, hazards, etc. please refer to safety data sheet.

Packaging

25 kg plastic sack Code N°: 273083
