Application dated: 2000-10-24

Received: 2000-10-26

**Beginning of
testing:** 2000-11-07

Scope:

Verification of the formulation of the mould lubricant spray

"LUSIN ALRO O 201"

for use as an external lubricant in the manufacture of food contact materials
made of plastics.

Herewith we confirm that the formulation

"LUSIN ALRO O 201"

disclosed confidentially meets the Recommendations issued by the Plastics
Commission of the Federal Institute for Health Protection of Consumers and
Veterinary Medicine (BgVV) and therefore can be used as mould lubricant for
the following plastic materials:

This test report covers of 2 pages.

Test reports may only be published in full and without any additions. For publications of modified reproductions and excerpts an irrevocable permission in writing must be obtained from BAM. The test results apply exclusively to the tested materials.
